

List of Poster Presentations

P-1 MIR-OPCPA front-end for ELI-ALPS

A. Thai, R. Maksimenka, C. Ferchaud, O. Albert, and N. Forget (FASTLITE)

P-2 Determination of absolute CEP from energy-resolved photoelectron angular distribution of rare gas atoms by circularly-polarized few-cycle pulses

Shinichi Fukahori¹, Toshiaki Ando¹, Shun Miura¹, Reika Kanya¹, Kaoru Yamanouchi¹, Tim Rathje², and Gerhard G. Paulus² (¹Department of Chemistry, School of Science, The University of Tokyo, Japan, ²Institut für Optik und Quantenelektronik, Friedrich-Schiller-Universität Jena, Germany)

P-3 State selective non-sequential double ionization of Ar through resonance double absorption of high-order harmonics

Kana Yamada¹, Atsushi Iwasaki¹, Takahiro Sato¹, Katsumi Midorikawa², and Kaoru Yamanouchi¹ (¹Department of Chemistry, School of Science, The University of Tokyo, ²Extreme Photonics Research Group, RIKEN Center for Advanced Photonics, RIKEN)

P-4 Enhancements in high-order ATI spectra of atoms and molecules

C. I Blaga*, J. Xu, K. Zhang, Y. H. Lai, P. Agostini and L. F. DiMauro (The Ohio State University)

P-5 Progress towards large flux high-order harmonic generation driven by two-color laser fields

T. Severt, J. Troß, P. Timilisina, S. Buczek, C. Trallero-Herrero, and I. Ben-Itzhak (J.R. Macdonald Laboratory, Department of Physics, Kansas State University)

P-6 Strong-field dissociation dynamics of molecular dications

T. Severt¹, Bethany Jochim¹, M. Zohrabi¹, U. Ablikim¹, Ben Berry¹, B. Gaire¹, K.J. Betsch¹, F. Anis¹, Tereza Uhlíková², K.D. Carnes¹, E. Wells³, B.D. Esry¹, and I. Ben-Itzhak¹ (¹J.R. Macdonald Laboratory, Physics Department, Kansas State University, ²Department of Analytical Chemistry, Institute of Chemical Technology, Prague Technická, ³Department of Physics, Augustana University)

P-7 Development of a mass-selective ion beam apparatus for investigating dissociation dynamics of molecular ions in intense laser fields

Takao Yamazaki, Keiji Fujiwara, Reika Kanya, and Kaoru Yamanouchi (Department of Chemistry, School of Science, The University of Tokyo)

P-8 Periodical ejection of triatomic hydrogen molecular ion from methanol induced by few-cycle laser pulses

Toshiaki Ando, Atsushi Iwasaki, and Kaoru Yamanouchi (Department of Chemistry, School of Science, The University of Tokyo)

P-9 The influence of wavepacket interference in multiphoton ionization

David B. Foote and Wendell T. Hill, III (Department of Physics, Joint Quantum Institute, and Institute for Physical Science and Technology, University of Maryland)

P-10 Factorized CI: Simplification of the MCTDHF scheme for laser-driven multi-electron dynamics

Erik Lötstedt, Tsuyoshi Kato, and Kaoru Yamanouchi (Department of Chemistry, School of Science, The University of Tokyo)

P-11 Structure of electric field and dynamics of contact surface due to the interaction between cluster and background gas irradiated by high power lasers

R. Matsui^{1,2}, Y. Fukuda², D. Kawahito¹, and Y. Kishimoto¹ (¹ Graduate School of Energy Science, Kyoto University, ² Kansai Photon Science Institute (KPSI), Japan Atomic Energy Agency (JAEA))

P-12 Development of an apparatus with high sensitivity for laser-assisted elastic electron scattering in femtosecond intense laser fields

Kakuta Ishida, Reika Kanya, and Kaoru Yamanouchi (Department of Chemistry, School of Science, The University of Tokyo)

P-13 Ion trap electron diffraction apparatus for determination of geometrical structure of molecular ions

Hideaki Tanaka, Keiko Kato a), Reika Kanya, and Kaoru Yamanouchi (Department of Chemistry, School of Science, The University of Tokyo)

P-14 Femtosecond electron diffraction: the nonthermal dynamics of near-UV photoexcitation-induced amorphization in phase change memory

Masaki Hada^{1,2,3}, Wataru Oba⁴, Masashi Kuwahara⁵, Ikufumi Katayama⁴, Toshiharu Saiki⁶, Jun Takeda⁴, and Kazutaka G. Nakamura^{2,7} (¹Graduate school of natural science and technology, Okayama University, ²Materials and Structures Laboratory, Tokyo Institute of Technology, ³PRESTO, Japan Science and Technology Agency, ⁴Department of Physics, Graduate School of Engineering, Yokohama National University, ⁵Electronics and Photonics Research Institute, National Institute of Advanced Industrial Science and Technology, ⁶Graduate School of Science and Technology, Keio University, ⁷CREST, Japan Science and Technology Agency)

P-15 Morphology transformation of Dirac cones under intense electromagnetic fields

Yosuke Kayanuma¹ and Keiji Saito² (¹Materials and Structures Laboratory, Tokyo Institute of Technology, ² Department of Physics, Keio University)

P-16 Ultrafast plasmon-phonon coupling dynamics in GaP and at GaP/Si (001) interfaces

Kunie Ishioka¹, Avinash Rustagi², Evan M. Thatcher², Christopher J. Stanton², Kristina Brixius³, Andreas Beyer³, Wolfgang Stolz³, Kerstin Volz³, Ulrich Höfer³, Hrvoje Petek⁴ (¹Nano-characterization Unit, National Institute for Materials Science, ²Department of Physics, University of Florida, ³Department of Physics and Materials Science Center, Philipps-Universität Marburg, ⁴Department of Physics and

Astronomy, University of Pittsburgh)

P-17 Simultaneous femtosecond-resolved observation of independent hole and electron dynamics in germanium by XUV transient absorption

Lauren J. Borja¹, Andrey Gandman¹, James S. Prell¹, C.D. Premmaraju^{2,3}, David Prendergast², Daniel M. Neumark^{1,3}, Stephen R. Leone^{1,3,4} (¹Department of Chemistry, University of California, Berkeley, ²The Molecular Foundry, Lawrence Berkeley National Laboratory, ³Chemical Sciences Division, Lawrence Berkeley National Laboratory, ⁴Department of Physics, University of California, Berkeley)

P-18 Extreme ultraviolet high harmonic generation and spectroscopy of solids

Tran Trung Luu, Manish Garg, Stanislav Kruchinin, Antoine Moulet, Mohammed Tharwat Hassan, and Eleftherios Goulielmakis (Max Planck Institute of Quantum Optics)

P-19 Strong field molecular ionization in the impulsive limit

Vincent Tagliamonti, Péter Sándor, Arthur Zhao, Thomas Weinacht¹, Tamás Rozgonyi², Mathias Ruckebauer, and Philipp Marquetand³ (¹Department of Physics and Astronomy, Stony Brook University, ²Research Centre for Natural Sciences, Hungarian Academy of Sciences, Institute of Materials and Environmental Chemistry, ³ Faculty of Chemistry, Institute of Theoretical Chemistry University of Vienna)
